THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME;

North American Plant Breeders

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF *seventeen* YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS SEED OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS REQUIRED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

BARLEY

'Georgie'

In Testimony Whereof, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington this 20th day of December in the year of our Lord one thousand nine hundred and seventy-six

ORIGIN AND BREEDING HISTORY OF VARIETY "GEORGIE"

Georgie was bred by Rothwell Plant Breeders in the United Kingdom, and was introduced for the USA by N.A.P.B. who have exclusive rights for the material for that territory.

Georgie was developed from the cross (Vada x Zephyr) ~~* 59114~~ made at Rothwell in 1966. ~~The line 59114 was of Dutch origin.~~ Pedigree *see 9/27/76** selection was employed throughout for the development of the variety, the definitive plant selection fixing the type being that chosen at F₄.

Plant rows were grown at F₆ for elimination of any deviant or off-type material, and those retained were rechecked at F₇ as plant row progenies before bulking as nucleus stock for multiplication here.

Stability is being ensured by fresh plant row selection each year for the initial stage of the variety multiplication programme.

Georgie has been accepted by the authorities in the United Kingdom as "Distinct, Uniform, and Stable" under the test procedure for grant of Plant Variety Rights. Attached as an appendix to this exhibit are photocopies of the Final Report of November, 1975 confirming this, which also includes statements of the variants counted in the test procedure.

Strict checks of ear row progenies by N.A.P.B. during multiplication in 1976 have found maturity variants (3%) and neck variants (under 1%). Such off-type progenies (and some doubtful for collar variation) were not included for the multiplication stock.

Attachment - Appendix

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

STABILITY

Satisfactory

See Remark (d) below

DISTINCTNESS

Distinct

Remarks

- (a) In its initial test year 1973, AFP 2/136 exhibited evidence of serious lack of uniformity in the submitted ears and the applicant was invited to submit further material for testing in 1974(see Interim Report dated 19.12.74).
- (b) In harvest year 1974, AFP 2/136 exhibited a lack of uniformity in both submitted ears and submitted seed and the applicant submitted further material for testing in 1975 (see 2nd Interim Report dated 13 February 1975).
- (c) In harvest year 1975, no lack of uniformity in the submitted ears was exhibited, routine sample examinations of the submitted seed showed it to be free from the variant(type C grains) encountered in the 1974 submission and distinctness was established.
- (d) In its initial test year 1973, AFP 2/136 exhibited slight evidence of a possible lack of stability in one major character. In subsequent submissions and material grown from them in harvest years 1974 and 1975, no further within-row variation was observed and in the 1975 seed and ear submission there was no evidence of variation in the major character. Although no submission has been tested through a cycle of reproduction, it is considered that there is little reason to suppose that the variety lacks stability.

BOTANICAL DESCRIPTION OF THE VARIETY "GEORGIE"

Georgie has type A grain (U.P.O.V. convention) with weak to moderate pigmentation in the lemma nerves at maturity. The base of the lemma is bevelled, the rachilla is of medium length and the grain has a ~~hairy~~ ^{glabrous} ventral furrow. See 5/27/76

Growth at tillering is semi-erect and the lower leaf sheaths are glabrous and pigmented. Flag-leaf auricles are pigmented, and so too are the tips of the awns. Georgie is moderately strongly glaucous at earing.

Georgie has ears between medium-lax and lax, and of 2-row conformation. Awns are rough, equal to or slightly longer than the ear. The first rachis segment is of medium length and width and is fairly strongly curved. Middle rachis segments are straight to medium humped in profile.

The variety has short, stiff straw and the maturity is two days later than Betzes.

DATA INDICATIVE OF NOVELTY "GEORGIE"

Georgie is in general most similar to Vada. It differs in having considerably stronger straw, more resistance to lodging, and is two inches shorter. Resistance to loose smut is higher than that of Vada.

The grain of Georgie is distinct from Vada in having no ventral crease hairs beneath the rachilla.

Characteristics recognized by the National Institute of Agricultural Botany, Cambridge, for the United Kingdom are incorporated in the Recommended List; a copy of the 1976 list for spring barleys is attached as an appendix as additional confirmation that Georgie is a novel variety.

A high figure indicates that the variety shows the character to a high degree.
* Recommended by the Institute of Brewing as malting varieties, although new varieties may not have been proved on a commercial scale.
See the note on varieties for the north and south-west (page 14)

VARIETIES RECOMMENDED FOR GENERAL USE

Mazurka	Very high yield with early maturity and long but fairly stiff straw; very liable to ear loss when ripe. Good resistance to mildew.	Europa x H.4809. M.G.H., Holland.
Lofa Abed	Yield very high, and relative yield especially high in lower yielding situations. Good resistance to most diseases except Rhynchosporium. Rather late maturing. Straw rather weak.	Proctor x Minerva. Abed, Denmark.
Abacus	Very high yield with good resistance to mildew and moderately good resistance to brown rust. Straw rather weak.	Vada x Zephyr. Rothwell Plant Broaders, Lincs.
Wing	Good malting quality. Susceptible to yellow rust.	Lyallpur x Ingrid. Weibull, Sweden.
Hassan	Good malting quality with moderately good brown rust and good yellow rust resistance.	Delta x Fabio x (Kenia x Arabian variety). Cebeco, Holland.
Julia	Fairly stiff straw. Moderately good resistance to brown rust. Liable to ear loss when ripe.	Delta x Wisa. Cebeco, Holland.

VARIETIES RECOMMENDED FOR SPECIAL USE

Maris Mink	Recommended only for areas where Rhynchosporium is not normally prevalent; liable to severe infections in the west and south. Yield potential very high. Very short and very stiff straw. Good resistance to mildew. Late maturing.	Deba Abed x (Emir x Swallow), Plant Breeding Institute, Cambridge.
Armelle	Recommended for its very good resistance to Rhynchosporium and moderately good resistance to brown rust. Long but fairly stiff straw. Rather late maturing.	Ceres x Clermont, I.N.R.A., France.
Proctor	Recommended where a traditional malting barley is required, and for the south-west where Rhynchosporium is prevalent. Late maturing. Straw rather weak. Yield rather low.	Kenia x Plumage-Archer, Plant Breeding Institute, Cambridge.

NEW VARIETIES PROVISIONALLY RECOMMENDED

Ark Royal	Very high yield with very good malting quality and fairly stiff straw. Late maturing. Good resistance to most diseases.	Proctor x HP 5466, Rothwell Plant Breeders, Lincs.
Aramir	Very high yield and stiff straw. Good resistance to mildew and moderately good resistance to brown rust.	Volla x Emir, Cebecco, Holland.
Georgie	Very high yield and stiff straw. Moderately good brown rust resistance.	Vada x Zephyr, Rothwell Plant Breeders, Lincs.
Sundance	Very high yield and stiff straw. Good mildew resistance and moderately good brown rust resistance.	Vada x Zephyr, Rothwell Plant Breeders, Lincs.
Varunda	High yield and good resistance to disease except Rhynchosporium. Liable to ear loss when ripe.	Vada x Hillkema 1148, Wageningen, Holland.

Tyra

Recommended for its resistance to cereal cyst eelworm and high yield. Susceptible to yellow rust. Straw rather weak.

(Monte Criato x Heria) x (Rita x Dros), Pajbjerg, Denmark.

VARIETIES BECOMING OUTCLASSED

Universe	Very susceptible to Rhynchosporium. Liable to severe infections in the west and south. Yield potential very high. Very short and very stiff straw. Good resistance to mildew and moderately good resistance to brown rust but susceptible to yellow rust. Late maturing.	Abad 3371 x Vada, Milin Mareters, Cheater and King's Lynn.
Berac	Stiff straw and good malting quality. Very susceptible to yellow rust.	Balder x Erica, C.I.V., Holland.
Vada	Moderately good brown rust resistance but susceptible to yellow rust. Straw rather weak.	Hordeum laevigatum x Gull, Wageningen, Holland.
Midas	Yields best in the north, where brown rust is not normally prevalent. Requires good growing conditions. Responds to above average seed-rate. Short and very stiff straw. Rather late maturing. Grain small.	[(Proctor x Wong) x M.R.A.] x gamma ray mutant from Maythorpe, Milin Mareters, Chester and King's Lynn.
Zephyr	Fairly stiff straw. Liable to ear loss when ripe.	M2149 x Carlsberg, M.G.H., Holland.
Imber	Very good malting quality. Yield rather low. Liable to ear loss when ripe.	Elsa x Proctor, Guinness, Warminstar.

(Formerly of Little Rock, Arkansas)

STATEMENT OF THE BASIS OF APPLICANT'S OWNERSHIP: "GEORGIE"

Georgie was bred by full-time employees of Rothwell Plant Breeders Limited. Pursuant to terms of employment of such employees, ownership of the variety vested in Rothwell Plant Breeders Limited.

Pursuant to an agreement dated March 9, 1973, between Rothwell Plant Breeders and North American Plant Breeders, ownership of the variety in the U.S.A. and the right to apply for plant variety protection in the U.S.A. passed to the applicant.

Further information on this matter has been provided in the letter of February 3, 1976 from Mr. B. W. Greengrass, together with a notarized copy establishing N.A.P.B. as assignee of title to all Rothwell Plant Breeders' bred varieties in U.S.A.

Excerpts from:

NAPB-RPB
TECHNICAL COLLABORATION AGREEMENT

"AGREEMENT dated this 9th day of March 1973, between NORTH AMERICAN PLANT BREEDERS, a partnership of R-P and OPB (both as hereinafter defined) existing under the laws of the State of Connecticut, USA ("NAPB") on the one hand and ROTHWELL PLANT BREEDERS LIMITED, a company incorporated in England with its registered office at Field House, Grimsby, Lincolnshire, England ("RPB") on the other relating to technical collaboration between them as hereinafter recited.....

"WITNESSETH THAT the parties hereto agree as follows:

"ARTICLE I - DEFINITIONS

Following terms used herein shall have the following meanings:

- (4) 'Seed' means any reproductive material of Agricultural Crops.
- (5) 'Seed Know-How' means any knowledge, expertise and other information, and any rights of whatever nature (including but not limited to plant breeders' and similar rights) relating in any way to Agricultural Crops or Seed, or relating in any way to all processes, methods and apparatus for the breeding, planting, harvesting, production and treating of Agricultural Crops and Seed. Proprietary or secret knowledge, expertise and other information and rights relating to chemicals used for treating Agricultural Crops or Seed are excluded from the definition of 'Seed Know-How' but such proprietary or secret knowledge, expertise and other information and rights relating to chemicals used for treating Agricultural Crops or Seed for the purpose of creating inheritable characteristics in Agricultural Crops or Seed are included in such definition.

"ARTICLE IV - TECHNICAL COLLABORATION AND LICENSING

- (1) RPB, to the extent of its rights and during the term of this Agreement, shall (a) make available to NAPB on a continuing basis, all Seed available to RPB for the NAPB territory from all sources in quantities for initial plant breeding purposes, (b) disclose and transfer to NAPB on a continuing basis for use in the NAPB territory in connection with the breeding, development, production and sale of Seed all present and future Seed Know-How available to RPB for the NAPB territory from all sources, and (c) assign and continue to assign to NAPB all its right, title and interest in and to said Seed Know-How and said Seed for exploitation throughout the NAPB territory.....
- (4) Any assignments made or licenses granted under the provisions of Clauses (1), (2) or (3) hereof shall be in perpetuity or for the life of the rights being assigned or licensed. However, the respective obligations of the parties to make such assignments and grant such licenses to each other hereunder with respect to new Seed or new Seed Know-How, shall terminate forthwith upon termination of this Agreement for any reason.
- (7) Insofar as NAPB has the right by way of assignment of all right, title and interest in Seed Know-How: (i) NAPB shall have the exclusive right to take whatever action it deems necessary to protect Seed Know-How in the NAPB territory by filing application for plant breeders certificate and similar rights; (ii) RPB shall assist NAPB in securing and transmitting all information for the completion and prosecution of such applications; (iii) within thirty (30) days after the execution of this Agreement RPB shall assign to NAPB all applications for U.S. Certificates

for Plant Variety Protection and hereby grants to NAPB the exclusive right to file applications for Plant Variety Protection Certificates and to be the owner of all rights with respect thereto, including the right to enforce such Certificates and rights represented thereby against unauthorized third parties. Reciprocally, RPB shall have similar exclusive rights for the RPB territory and NAPB shall render similar assistance and make similar assignments to RPB.

"IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

CERTIFICATE OF AMENDMENT
OF
CERTIFICATE OF INCORPORATION
OF
AGR ACQUISITION CORPORATION

AGR Acquisition Corporation, a corporation organized and existing under and by virtue of the General Corporation Law of the State of Delaware,

DOES HEREBY CERTIFY:

FIRST: that the Board of Directors of said corporation, by the unanimous written consent of its members filed with the minutes of the Board, adopted a resolution proposing and declaring advisable the following amendment to the Certificate of Incorporation of said corporation:

RESOLVED, that the Certificate of Incorporation of this corporation be amended by changing the Article thereof numbered "ARTICLE I" so that, as amended, said Article shall be and read as follows:

"ARTICLE I

Name

The name of the corporation (hereinafter called the 'Corporation') is Agripro Seeds, Inc."

SECOND: That in lieu of a meeting and vote of stockholders, the sole shareholder of the corporation has given unanimous written consent to said amendment in accordance with the provisions of Section 228 of the General Corporation Law of the State of Delaware.

THIRD: That the aforesaid amendment was duly adopted in accordance with the applicable provisions of Sections 242 and 228 of the General Corporation Law of the State of Delaware.

FOURTH: That the capital of said corporation shall not be reduced under or by reason of said amendment.

IN WITNESS WHEREOF, said AGR Acquisition Corporation has caused this certificate to be signed by Gary T. Hancock, its President, and attested by Ann Steelman, its Secretary, this 30th day of June, 1994.

Re: Agripro Biosciences Inc. Sale of PVPs to AGR Acquisition Corporation (which has changed its name to Agripro Seeds, Inc.)

Dear Ms. Zempolich:

I am enclosing herewith the Bill of Sale and Assignment wherein Agripro Biosciences Inc. has sold and assigned all of its right, title and interest in and to the PVPs listed on the attachment to the Bill of Sale to AGR Acquisition Corporation and hereby request that your records be changed to show the new owner as Agripro Seeds, Inc., the new name of AGR Acquisition Corporation. It is our understanding that the attachment was generated by someone in your office and forwarded to Agripro Biosciences Inc. at its request, and was subsequently forwarded to our office as attorneys for the purchaser in connection with the sale transaction.

As I indicated to you in our several previous telephone conversations, AGR Acquisition Corporation changed its corporate name to Agripro Seeds, Inc. the same date as the closing of the sale. I am enclosing herewith a copy of the Certificate of Amendment filed by the Delaware Secretary of State wherein the corporate name is changed.

If I counted correctly, there are 149 PVP certificates listed on the attachment to the Bill of Sale and Assignment. I am enclosing a check in the amount of \$3,725.00 payable to United States Treasury in payment of the \$25.00 per certificate fee to change the owner's name on your records.
